A home workout with no equipment

You can get a solid strength session in twenty minutes with just your body weight. Do each exercise for 40 seconds, rest for 20, and go around the circuit three times.

Circuit: squats, push-ups (on your knees if needed), reverse lunges, a plank, glute bridges, and mountain climbers. Keep your back straight in the plank and push your knees out in the squat.

Do this three times a week with a rest day in between. When it feels easy, slow each repetition down or add a second round instead of rushing.
